RESEARCH OUTPUT METADATA IN WIKIDATA

LET'S ENRICH A PUBLICATION WITH OPEN DATA

-
1. Go to journal with open review (e.g. [WikijSci.org](https://www.wikijsc.org/))
 2. Pick one of the DOIs and search in Wikidata
 - a) Add statement [reviewed by](#) [reviewer Wikidata item]
 - b) Add qualifier [start time](#) is the [date of the review]
 - c) Add statement [significant event](#) of [submission](#)
 - d) Add qualifier [point in time](#) is the [date of submission]

Completed example

[Q76846397](#)

LET'S CURATE AN ARTICLE WITH RETRACTION DATA

-
1. Go to retractiondatabase.org
 2. In tools.wmflabs.org/sourcemd/index_old.php add the DOI for the *retraction notice*
 - a) Add statement [instance of](#) a [retraction notice](#)
 3. In Wikidata, search for the DOI/title for the *original publication*
 - a) Add statement [point in time](#) a [retracted paper](#)
 - b) Add statement [is retracted by](#) the [retraction notice Wikidata item]
 - c) Add qualifier [start time](#) is the [date of retraction]

Completed examples

[Q61957492](#) (Article)

[Q29030043](#) (Retraction notice)

[Q58419365](#) (Retraction of that retraction notice!)

LET'S ENRICH A DATASET WITH OPEN DATA

-
1. Go to list of datasets with a known author at [w.wiki/H9e](https://www.wikidata.org/wiki/H9e)
 2. Pick one of the datasets with a descriptive title
 - a) Add statement [main subject](#) is [key concept described]
 - b) Repeat as required
 - c) Experiment with greater specificity using qualifiers

Completed examples

[Q84981226](#)

[Q24853127](#)
